

# Matrak Material Tracking

Material tracking made easy

## OVERVIEW

Matrak's **material tracking platform** was built to help you stay on top of your projects easily and efficiently.

Connect with your entire construction supply chain and streamline communication with key stakeholders of your project – all while knowing the location and status of your materials for complete visibility. Material status is key to a project's progression and reducing risks.

By creating supply chain visibility and enabling project-wide collaboration, you and your team can deliver more projects on time and within budget.

Matrak was the tool that brought together the overseas procurement together with the local installer with the site team - which then helped Icon deliver our project on time.

ICON

## KEY BENEFITS

- 1 End-to-end supply chain visibility**  
Supply chain transparency connects everyone onto a single platform for easy communication.
- 2 Optimise & manage field productivity**  
Deliver more successful projects with in-depth data, and optimise collaboration between head office and on-site subcontractors.
- 3 Single source of truth**  
A single source of truth means your team can provide evidence of work completed for accurate progress claims.
- 4 Project wide collaboration**  
Streamline communications in Matrak's cloud-based app. Easily connect with your key stakeholders and improve project productivity through teamwork.
- 5 Protect your budget**  
Reduce risks, delays and reworks with real-time visual progress updates that help you identify issues early.
- 6 Critical Insights**  
Access and analyse insightful field data at any time to deliver projects more efficiently.

# How it works

## About Matrak

Matrak offers end-to-end supply chain visibility for manufacturing, construction and building teams. A global construction tracking network, Matrak was designed specifically to simplify the complexities of moving and tracking material status, from manufacture to install and anywhere in between.

Matrak allows you to track complex material interactions and manage operations from a single source of truth, offering a global digital network that helps create collaboration and connection in construction. Find out more at [www.matrak.com](http://www.matrak.com).

### Update progress in app

View and directly update progress from interactive drawings and QR codes. All hypergranular data is stored and shared project-wide, in real time.

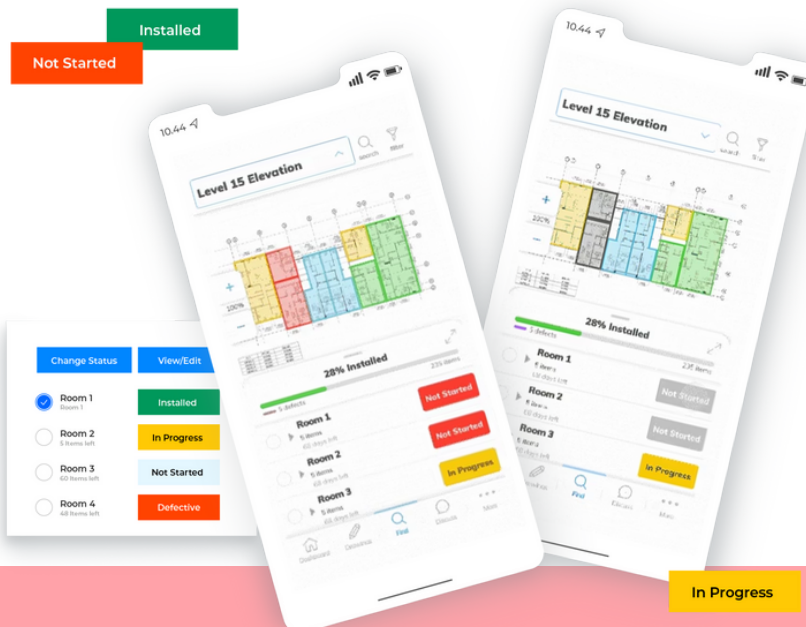

### Generate reports

Use your data to make better business decisions and automatically generate reports that share important information to clients.

### Upload drawings

The Matrak app will create a Bill of Materials from your drawings and make them interactive for real-time updates.
