What's in it for me?

This guide is for both new and experienced Matrak users. Each tip has two parts:

 *How it works in Matrak*

 *Why this Matters?*

1 Build your reputation as a global industry leader

HOW IT WORKS IN MATRAK

- Produce run rate reports that provide real-time material procurement and tracking information
- Use QR code stickers to help your site and warehousing teams easily identify what products are in which stillages and crates. Meanwhile, interactive drawings help them identify where those materials are supposed to go onsite
- Get reorders for defective items quicker with instant notifications. If a material is marked as defective on site, easily communicate this to your manufacturer or supplier with in-app notifications. Real time notifications assist with alleviating communication delays when reordered materials that can affect the project schedule – getting the job done faster
- Run full quality performance checks entirely in Matrak for confidence that your manufactured products meet the quality standard. Increase control of your quality assurance process to minimise risk of non conforming products before they arrive on site

WHY THIS MATTERS

The challenges of global supply chains puts your company's reputation at risk. But having a tool that can improve management of stakeholder communication and expectations helps you build trust in your services. Plus, using the right tools helps you provide exceptional services to your clients and protects your reputation as reliable partners in the industry.

2 Monitor material progress for more control of your procurement process

HOW IT WORKS IN MATRAK

Matrak tracks your materials from procurement to sub-assembly, manufacturing to quality checking, straight through to dispatch out of the warehouse. Having clarity of where materials are along the supply chain gives you an indication of progress.

Being aware of disruptions ahead of time not only reduces the risk of potential problems happening along the way, but also helps you confidently meet customer requirements.

WHY THIS MATTERS

Having full visibility over your material procurement processes improves your customer service, as well as cost controls through inventory in motion within the supply chain and proactive status updates.

Tina Marshall: Status - Delivered to Site	Mar 3, 2021 at 9:12 AM
David Ford: Status - Arrived in Yard	Mar 2, 2021 at 12:34 PM
Hana Davidson: Status - Complete	Feb 26, 2021 at 8:26 AM

What's in it for me?

This guide is for both new and experienced Matrak users. Each tip has two parts:

 *How it works in Matrak*

 *Why this Matters?*

3 Reduce risks by linking the full quality assurance (QA) and quality control (QC) assessments to products before they arrive on site

HOW IT WORKS IN MATRAK

Run full quality performance checks entirely in Matrak to ensure your manufactured products meet the agreed standards. On Matrak, your Inspection Test Plan (ITPs) are digitised and linked to the item record, allowing you to manage and report on the quality of your supplied materials.

This minimises the risk of non-conforming products arriving on site. Matrak's audit log enables you to log the dates and people responsible for the work being inspected, which improves overall traceability.

WHY THIS MATTERS

Supplying quality materials builds trust with your clients. Providing evidence of your products' conformance to the agreed quality standards, before they get to site, reduces the risk of supplying materials that are below standard and wasting money through reorders.

View Material	Activity Log		
QA Glazed	N/A	Pass	Fail
Final Manufacture	N/A	Pass	Fail
Item packed with foam buffer	N/A	Pass	Fail
Checked for Scratches	N/A	Pass	Fail

4 Use tracking information to gain insights that improve your processes and increase forecasting accuracy

HOW IT WORKS IN MATRAK

Matrak consolidates your data on one centralised platform, providing insights that help you create unity in your supply chain, increase collaboration and predict challenges.

Access information easily to assist you in making quick, smart, data-backed decisions. Use this data to automatically generate reports to understand forecasting trends and make more informed business decisions.

WHY THIS MATTERS

Tracking information provides the foundation for future planning, capturing lessons learned, increasing quoting accuracy and more.

Without the right tools, you might forecast demand incorrectly, which can lead to too much or too little inventory at different points in your supply chain.

Storing key information in multiple documents and spreadsheets can easily expose projects to risks. Plus, manual reporting on static data not only takes up valuable time, but can be inaccurate.

This makes it unreliable when trying to make informed business decisions about forecasting trends to meet supply and demand.

Run Rates (Average to date)

Glazing/Curing	Storage	Installed
89	112	158
Per day	Per day	Per day
Due: 01/08/21	Due: 15/09/21	Due: 15/09/21
ETD: 15/07/21	ETD: 04/09/21	ETD: 04/09/21zzzzzzz
